

# MGMT 353 Organizational Behavior Case Analysis Instructions

---

## Content Instructions:

1. Answer each question at the end of the case reading.
2. Provide information you learned from the chapter in answering a question. This shows me you understand how the material in the chapter applies to the case analysis.
3. As you make a comment or assessment in answering a particular question, cite examples from the case that provide support for the point you are making.
4. I want instructions #2 and #3 to prevent you from answering all of the questions by merely stating your opinion on the issues being asked. While your opinion is appropriate to include in an answer, it should not be the sole basis for an answer. Also, you should clearly state that it is your opinion and what the basis for your opinion is (e.g., my life experience has taught me...; through my work I have seen this issue in action...; etc.)

1. ***Failure to follow each of the format instructions will result in a reduction in the assignment grade, even if all other aspects of the assignment are correct.***
