Teaching Evaluations

Though difficult for anyone to address appropriately, one's teaching evaluations are among the most important information in any professor's curriculum vitae. Student and peer evaluations of my teaching have always placed me among the best teachers in every department in which I have taught (Psychology, Education, and Physical Education). This has occurred despite the fact that I typically teach courses that are quantitative, research oriented, and often required; thus anything but preferred by most students. Specific data supporting this summary will be made available upon request.

Certifications

I am a certified School Psychological Examiner in the State of Missouri (the closest status Missouri had to School Psychologist certification), and also hold a Life Certificate in Missouri as a Teacher.

Publications

In addition to the refereed and non-refereed professional publications listed below, I also am in my eighth year of authoring a *sport psychology column* titled *The Mental Game*, which appears in **The SportsPage**, a quarterly publication of Orthopedic Associates, Inc., David Shenton, M.D., Editor. In *The Mental Game* columns, I translate specialized sport psychology concepts into interpretable and usable information for the non-psychologist reader. Though not refereed, the column continues to meet the scholarship standards of the physicians who publish this quarterly journal as well as the other physicians, athletic trainers, physical therapists and related health care professionals who receive the publication and place it in their waiting rooms.

Intermittently I also write a similar column for the **State of the Games**, the official newsletter for the National Congress of State Games, which is the organizing body for all of the various State Games conducted annually by over 40 state organizations. Again, the response to this has been very positive and offering this kind of professional expertise was one of the dimensions that led the National Congress of State Games to enter into an agreement for MSU-Billings to be the educational services provider to the National Congress.
