Montana Computer Network Security Conference March 11 & 12 2004

@ Montana State University-Billings College of Technology
3803 Central Avenue in Billings, Montana

Our world has become increasingly connected, relying on the internet for communication and the exchange of data. Viruses, worms and security breaches have become international news and the security of systems and networks have become an urgent priority.

This conference provides computer professionals - management and technical - with current information on network security, common threats and prevention, risk assessment, and disaster recovery.

Who Should Attend?

The Network Security Conference is designed for managers and technicians in computer network security roles. Learn what is current plus what the future has in store in the field of network security, computer and internet crime, and computer forensics.

The Montana Computer Network Security Conference provides separate tracks for managers and technicians. A technical background is required for the Tech Tracks.

Managerial Tracks include:

- Network concepts & vulnerabilities
- Company policies & auditing
- Risk assessment, business continuity/disaster recovery, & legal liability
- Physical security, intrusion detection, forensics & when to contact the authorities.

Technical tracks include:

- Common exploits & prevention
- Perimeter network security configuration
- Wireless security
- Physical security, intrusion detection, forensics, disaster recovery & when to call the authorities.

"You can only protect against someone who knows less than you!"

Tim Urbaniak,
College of Technology

Speakers & Guests

- Pam Turner**, Government Affairs, Department of Homeland Security, Washington, D.C.
- Howard A. Schmidt**, eBay, Vice President & Chief Information Security Officer
