INSTRUCTOR: Dr. Rhonda Dillman

OFFICE: Sci 245

PHONE: 657-2025 E-MAIL: rdillman@msubillings.edu

OFFICE HRS: 9:15-10:15 am MWF or by appt. or if I’m in my office and the door is open.

COURSE OBJECTIVES:
1. To learn to recognize and identify the major organic functional groups.
2. To name organic compounds according to IUPAC rules.
3. To learn the importance of acid/base chemistry in organic chemistry.
4. To learn the importance of stereochemistry in organic chemistry.
5. To learn the major reactions of each of the functional groups (especially those important to biological systems).
6. To learn and understand a mechanistic approach to organic reactions.

CLASS GUIDELINES:
1. Attendance will be taken this semester and used to determine grades in borderline cases. More than 3 absences will result in the lower grade.
2. Read the material before you come to class. Lectures will be much easier to follow if you have seen the material before. It is important to keep up with the material.
3. Work as many problems at the end of the chapters as you can. Working problems is the best way to determine if you understand the material.

OUTCOMES ASSESSMENT (GRADING):
1. Exams must be taken at the assigned time unless excused beforehand.
2. All exams will be worth 100 points and may consist of short answers, problems, essays. There will be 6 exams. You will NOT be allowed to drop an exam grade. Each exam will account for 13% of your grade.
3. Your graded homework will be online. See handout for instructions. I have also included a list of end of chapter problems that you should try to work. The more problems you work the better prepared you will be for the exams! Graded homework will account for 22% of your grade.
4. The grading scale will start out as follows. However the scale is subject to change by the end of the semester.
   A  90 and above
   B  80-89
   C  65-79
   D  50-64
   F  49 and below

**Incompletes will be given for medical excuses only!!**
**CHMY 211**

**FINAL - EXAM 6 (CH 10/12)– Tuesday, April 27 8:00-9:50 am**

**This schedule is subject to change at anytime throughout the semester**

**CHAPTER LISTING**
- Ch 1 – Structure and Bonding: Acids and Bases
- Ch 2 – The Nature of Organic Compounds: Alkanes
- Ch 3 – Alkenes: The Nature of Organic Reactions
- Ch 4 – Reactions of Alkenes and Alkynes
- Ch 5 – Aromatic Compounds
- Ch 6 – Stereochemistry
- Ch 7 – Alkyl Halides
- Ch 8 – Alcohol, Ethers and Phenols
- Ch 9 – Aldehydes and Ketones
- Ch 10 – Carboxylic Acids and Derivatives
- Ch 12 – Amines

**POLICY ON ACADEMIC HONESTY:** All students are expected to adhere to the highest standards of academic honesty and refrain from any action that is dishonorable or unethical. In all examinations and homework, students are expected to submit their own work. Any violation of Academic Honesty Policy will be dealt with severely.
