General Information:	

Students pursuing an Associate of Science in Fire Science will refer to the general catalog for academic policies.

**Transfer credits from other institutions** – Students who wish to graduate with an Associate of Science in Fire Science must earn a minimum of 20 credits at MSU-Billings with a GPA of 2.00 or higher. Refer to the general catalog for details.

**Prior Learning Assessment** – Students may have already earned credit through work-site training, government-sponsored workshops, or military experience. Certificates or documentation which state that the American Council on Education (ACE) or the National Program on Non-Collegiate Sponsored Instruction (PONSI), assesses that training credit may be available for coursework for which there are equivalencies in MSU Billings curriculum.

**EMT Certification** – Students who have a current National Registry EMT certification card, may be awarded up to 6 credits of coursework. For students who submit their National Registry EMT card, three credits will be awarded to complete the Life Science category (non-lab) and three credits will be awarded to fulfill the Social Science category.

Students are encouraged to earn their National Registry EMT certification. It is not required for the Fire Science program, but strongly encouraged for job placement and an option to get college credits for this training. Early completion of the certification can assist with better academic planning and not delay graduation.

The current National Registry EMT certification card is to be submitted to Jacket Student Central in the City College Tech Building or <a href="mailto:ccadvising@msubillings.edu">ccadvising@msubillings.edu</a> for college credits to be awarded and applied towards graduation.

**FIRE Courses** – can be started in either the fall or spring semester.

**TRID 160** – should be completed in a student's LAST Spring semester so that a student will have a current hazardous material certification when they graduate.

Students may wish to continue on to a bachelor's degree. General Education courses can be carefully chosen with an advisor in order to ensure a more seamless transition after completion of this AS degree.
