### **Developing a Plan of Study**

To facilitate course planning and scheduling, students should be aware that not all courses are offered every semester. Some courses require prerequisite courses to be successfully completed or corequisite courses be taken simultaneously.

### **Program Specific Information**

Students should know the following information:

- This certificate is stackable with the Medical Coding & Insurance Billing Specialist AAS degree.
- This program can be completed fully online or in a combination of online and on-campus classes. Please verify the rotation of courses to best develop a plan that works for you.
- For students that don't have a background in medical terminology or basic human biology, AHMS 144 Medical Terminology and BIOH 104 Basic Human Biology should be taken before or with AHMS 160 and AHMS 162 for best readiness.
- Upon completion of the program, students will be able to sit for the American Academy of Professional Coders (AAPC) or American Health Information Management Association (AHIMA) coding exams.
