

## Fall 2025 Paramedic Program Application Process On Campus Option

Applications must be submitted by, Friday June 6<sup>th</sup> (no later than 4:00 PM). Student acceptance notification will be emailed by mid-July. Please complete the application and scan it along with all required documentation. Email completed applications and documents to Janet Drinkwalter [janet.drinkwalter@msubillings.edu](mailto:janet.drinkwalter@msubillings.edu). Applications will only be accepted via email. DO NOT hand deliver them to City College. The application and all other required documents must be sent in one email and must be in PDF format. If the submission process is not followed it may negatively affect your acceptance into the program. Any missing documentation will cause the application to be returned and corrected before resubmission and consideration for acceptance.

Documents students must submit along with their paramedic on campus application:

- *Current NREMT certification*
- *Unofficial transcripts of required prerequisite classes and education attached with application*
- *Official transcript(s) must be sent to MSU Billings City College Admissions Office (if attended other regionally accredited colleges) **prior** to the application deadline*

### **Clinical Placement**

Billings clinical sites have a max of 18 students a year. With two programs running concurrent placement at Billings sites will be first awarded to in person students. Once in person students are assigned clinical sites online students will be assigned to Billings clinical sites. If the demand for Billings or other City clinical sites is greater than availability a tie breaker will be done to place students. The tie breaker is as follows.

1. Prerequisite GPA
2. Cumulative GPA
3. Took pre-requisite classes through MSUB
4. Previous application to the paramedic program
5. Veteran

If a student is not able to get into a clinical site in Billings or the city they request, all efforts will be made to place that student at a clinical site as close as possible to the city of their choice. Exemptions can be made by the program director discretion and will be reviewed on a case-by-case bases.

### **Competitive selection process for applicants**

The paramedic program requires clinical and field internships. Our capacity within the online program will be based on clinical availability and instructor load. If more students apply than can be accepted into the program, a competitive selection process will be utilized. The following is the process used.

**1. Prerequisite Grades.** Points will be awarded based on the grade point average (GPA) of only the prerequisite semester courses (or equivalent transfer courses).

***Maximum points: 4***

2.0 GPA: (2.0 points) 2.7 GPA: (2.7 points) 3.4 GPA: (3.4 points)  
2.1 GPA: (2.1 points) 2.8 GPA: (2.8 points) 3.5 GPA: (3.5 points)  
2.2 GPA: (2.2 points) 2.9 GPA: (2.9 points) 3.6 GPA: (3.6 points)  
2.3 GPA: (2.3 points) 3.0 GPA: (3.0 points) 3.7 GPA: (3.7 points)  
2.4 GPA: (2.4 points) 3.1 GPA: (3.1 points) 3.8 GPA: (3.8 points)  
2.5 GPA: (2.5 points) 3.2 GPA: (3.2 points) 3.9 GPA: (3.9 points)  
2.6 GPA: (2.6 points) 3.3 GPA: (3.3 points) 4.0 GPA: (4.0 points)

**Please Note:** Students must have a 2.0 Overall GPA and a grade of C or better in all prerequisite classes for program eligibility.

**2. Education.** Points will be awarded for completion of specific education beyond the courses required for the paramedic prerequisite courses.

***Maximum points: 4***

- Anatomy & Physiology courses, 200 level or above with “C” or higher grade
  - Anatomy & Physiology I - (.25 points)
  - Anatomy & Physiology II (.25 points)
- Associate degree from an accredited institution (2 points)
- Bachelor’s degree from an institution (4 points)

If there is a tie in the competitive application process for the last spot the following tie breakers will be used in the order listed below:

1. Prerequisite GPA
2. Cumulative GPA
3. Took pre-requisite classes through MSUB
4. Previous application to the paramedic program
5. Veteran

**Additional documentation required if selected into the program (DO NOT submit with your application)**

**Immunization requirements**

The following immunizations are required to enter the program and all clinical sites. DO NOT SUBMIT them with your competitive application. If you are accepted into the Paramedic core program classes, you must have all the following immunizations. All these documents will be uploaded into an online software for clinical site usage. Instructions will be given upon entry to the paramedic program.

MMR- Mumps, Measles, and Rubella  
Hepatitis B – 3 doses  
Varicella or Titer  
Diphtheria  
Tetanus  
TB Skin Test withing last calendar year

**Criminal background check**

All students are required to pass a criminal background check and urine drug testing to be accepted into clinical settings. The total cost for both is around \$130.00. Information will be given on how to do these once you are accepted into the program.

## **COVID**

Most clinical sites are requiring proof of COVID vaccination. Clinical sites have given the option to apply for religious or medical exemption. These requests are received and accepted on a case by case bases. There is not guaranteed if your exemption will be accepted, the student must plan accordingly.

## **Influenza**

Along with COVID clinical sites are requiring proof of an influenza vaccine prior to admittance into the site. Clinical sites also grant the option to apply for a religious or medical exemption, however these are not guaranteed, the student must plan accordingly.

# **Important Paramedic Career Information**

The following is the Paramedic Functional Job Analysis and Technical Standards published by the US Department of Transportation. All applicants should review the material below prior to applying to the program.

## **Paramedic Characteristics**

The Paramedic must be a confident leader who can accept the challenge and high degree of responsibility entailed in the position. The Paramedic must have excellent judgement and be able to prioritize decisions and act quickly in the best interest of the patient, must be self-disciplined, able to develop patient rapport, interview hostile patients, maintain safe distance, and recognize and utilize communication unique to diverse multicultural groups and ages within those groups. Must be able to function independently at optimum level in a non-structured environment that is constantly changing.

Even though the Paramedic is generally part of a two-person team generally working with a lower skill and knowledge level Basic EMT, it is the Paramedic who is held responsible for safe and therapeutic administration of drugs including narcotics. Therefore, the Paramedic must not only be knowledgeable about medications but must be able to apply this knowledge in a practical sense. Knowledge and practical application of medications include thoroughly knowing and understanding the general properties of all types of drugs including analgesics, anesthetics, anti-anxiety drugs, sedatives and hypnotics, anti-convulsant, central nervous stimulants, psychotherapeutics which include antidepressants, and other anti-psychotics, anticholinergics, cholinergics, muscle relaxants, anti-dysrhythmics, anti-hypertensives, anticoagulants, diuretics, bronchodilators, ophthalmic, pituitary drugs, gastro-intestinal drugs, hormones, antibiotics, antifungals, anti-inflammatories, serums, vaccines, anti-parasitic, and others.

The Paramedic is personally responsible, legally, ethically, and morally for each drug administered, for using correct precautions and techniques, observing and documenting the effects of the drugs administered, keeping one's own pharmacological knowledge base current as to changes and trends in administration and use, keeping abreast of all contraindications to administration of specific drugs to patients based on their constitutional make-up, and using drug reference literature.

The responsibility of the Paramedic includes obtaining a comprehensive drug history from the patient that includes names of drugs, strength, daily usage and dosage. The Paramedic must take into consideration that many factors, in relation to the history given, can affect the type medication to be given. For example, some patients may be taking several medications prescribed by several different doctors and some may lose track of what they have or have not taken. Some may be using nonprescription/over the counter drugs. Awareness of drug reactions and the synergistic effects of drugs combined with other medicines and in some instances, food, is imperative. The Paramedic must also take into consideration the possible risks of medication administered to a pregnant mother and the fetus, keeping in mind that drugs may cross the placenta.

The Paramedic must be cognizant of the impact of medications on pediatric patients based on size and weight, special concerns related to newborns, geriatric patients and the physiological effects of aging such as the way skin can tear in the geriatric population with relatively little to no pressure. There must be an awareness of the high abuse potential of controlled substances and the potential for addiction, therefore, the Paramedic must be thorough in report writing and able to justify why a particular narcotic was used and why a particular amount was given. The ability to measure and re-measure drip rates for controlled substances/medications is essential. Once medication is stopped or not used, the Paramedic must send back unused portions to proper inventory area. The Paramedic must be able to apply basic principles of mathematics to the calculation of problems associated with medication dosages, perform conversion problems, differentiate temperature reading between centigrade and Fahrenheit scales, be able to use proper advanced life support equipment and supplies ( i.e. proper size of intravenous needles ) based on patient's age and condition of veins, and be able to locate sites for obtaining blood samples and perform this task, administer medication intravenously, administer medications by gastric tube, administer oral medications, administer rectal medications, and

comply with universal pre-cautions and body substance isolation, disposing of contaminated items and equipment properly.

The Paramedic must be able to apply knowledge and skills to assist overdosed patients to overcome trauma through antidotes, and have knowledge of poisons and be able to administer treatment. The Paramedic must be knowledgeable as to the stages drugs/medications go through once they have entered the patient's system and be cognizant that route of administration is critical in relation to patient's needs and the effect that occurs.

The Paramedic must also be capable of providing advanced life support emergency medical services to patients including conducting of and interpreting electrocardiograms (EKGs), electrical interventions to support the cardiac functions, performing advanced endotracheal intubations in airway management and relief of pneumothorax and administering of appropriate intravenous fluids and drugs under direction of off-site designated physician.

The Paramedic is a person who must not only remain calm while working in difficult and stressful circumstances, but must be capable of staying focused while assuming the leadership role inherent in carrying out the functions of the position. Good judgement along with advanced knowledge and technical skills are essential in directing other team members to assist as needed. The Paramedic must be able to provide top quality care, concurrently handle high levels of stress, and be willing to take on the personal responsibility required of the position. This includes not only all legal ramifications for precise documentation, but also the responsibility for using the knowledge and skills acquired in real life-threatening emergency situations.

The Paramedic must be able to deal with adverse and often dangerous situations which include responding to calls in districts known to have high crime and mortality rates. Self-confidence is critical, as is a desire to work with people, solid emotional stability, a tolerance for high stress, and the ability to meet the physical, intellectual, and cognitive requirements demanded by this position.

### **Physical Demands**

Aptitudes required for work of this nature are good physical stamina, endurance, and body condition that would not be adversely affected by frequently having to walk, stand, lift, carry, and balance at times, in excess of 125 pounds. Motor coordination is necessary because over uneven terrain, the patient's, the Paramedic's, and other workers' well-being must not be jeopardized.

### **Overview**

The Paramedic provides the most extensive pre-hospital care and may work for fire departments, private ambulance services, police departments or hospitals. Response times for nature of work are dependent upon nature of call. For example, a Paramedic working for a private ambulance service that transports the elderly from nursing homes to routine medical appointments and check-ups may endure somewhat less stressful circumstances than the Paramedic who works primarily with 911 calls in districts known to have high crime rates. Thus, the particular stresses inherent in the role of the Paramedic can vary, depending on place and type of employment.

However, in general, in the analyst's opinion, the Paramedic must be flexible to meet the demands of the ever-changing emergency scene. When emergencies exist, the situation can be complex and care of the patient must be started immediately. In essence, the Paramedic in the EMS system uses advanced training and equipment to extend emergency physician services to the ambulance. The Paramedic must be able to make accurate independent judgements while following oral directives. The ability to perform duties in a timely manner is essential, as it could mean the difference between life and death for the patient.

Use of the telephone or radio dispatch for coordination of prompt emergency services is required, as is a pager, depending on place of employment. Accurately discerning street names through map reading, and correctly distinguishing house numbers or business addresses are essential to task completion in the most expedient manner. Concisely and accurately describing orally to dispatcher and other concerned staff, one's impression of patient's condition, is critical as the Paramedic works in emergency conditions where there may not be time for deliberation. The Paramedic must also be able to accurately report orally and in writing, all relevant patient data. At times, reporting may require a detailed narrative on extenuating circumstances or conditions that go beyond what is required on a prescribed form. In some instances, the Paramedic must enter data on computer from a laptop in ambulance. Verbal skills and reasoning skills are used extensively.

## **Fall 2025 Paramedic On Campus Associate of Applied Science Degree Application form**

**APPLICATION DEADLINE: MUST BE RECEIVED NO LATER THAN 4:00 PM  
ON FRIDAY, JUNE 6, 2025**

Applications are to be emailed to Janet Drinkwalter at [janet.drinkwalter@msubillings.edu](mailto:janet.drinkwalter@msubillings.edu)

Questions/clarifications about the application process can be emailed to the Director of the Paramedic Program:

Chad Landon [clandon@msubillings.edu](mailto:clandon@msubillings.edu)  
3803 Central Avenue  
Billings, MT 59102

**TO BE ELIGIBLE FOR CONSIDERATION, YOU MUST BE ADMITTED TO MSU BILLINGS  
PLEASE CONTACT ADMISSIONS AT 406-247-3007**

LAST NAME

CITY, STATE, ZIP

ARE YOU CURRENTLY AN NREMT? ☐ Yes ☐ No **(Attach a copy of your certificate or card)**

Do you have criminal charges pending or have you ever plead guilty, forfeited bond, or been convicted of a crime (whether or not sentence was suspended or deferred), or have you pled no contest or had prosecution deferred whether or not an appeal is pending? If yes, attach a detailed explanation and documentation from the source. You must report but may omit documentation for: (1) misdemeanor traffic violations resulting in fines of less than \$100; and (2) charges or convictions prior to your 18<sup>th</sup> birthday unless you were tried as an adult. ☐ Yes ☐ No

## Prerequisite GPA (GPA of the prerequisite courses only)

The prerequisite GPA will be utilized in the competitive application process.

- For applicants, who have taken courses multiple times; the most recent verifiable grade will be used for scoring /GPA calculations.
- Points and GPAs will be calculated using the current catalog criteria which includes +/- weighing. Plus or minus is equivalent to the following:

(A) = 4.0  
(A-) = 3.7  
(B+) = 3.3  
(B) = 3.0

(B-) = 2.7  
(C+) = 2.3  
(C) = 2.0

**Applicants must have a “C” or better in the following prerequisite courses and also a minimum 2.0 selective GPA to qualify for admission to the program. Summer prerequisite courses can be in progress to submit this application. Grades will be reviewed upon official transcript prior to the start of the Fall semester.**

Course	MSUB Course Title	Approved substitution if taken at another college	Term	Grade	Credits
AHMS 144	Medical Terms				3
BIOH 104	Basic Human Anatomy				3
CAPP 120	Introduction to Computers				3
WRIT 122/121	Intro to Business Writing				3
M 105	Contemporary Math or equivalent course				3
ECP 200	Transition to Paramedic Care	This course will not be used in the prerequisite gpa process.			3

- Any courses that are fulfilled through CLEP, DANTES, AP, or courses that carry a pass in place of a grade on a college transcript,) will not be figured into the selective GPA.

**Attach copies of *all* college transcripts including MSU Billings (can be unofficial).** Remember that “Official transcripts” for all regionally accredited colleges must be turned into the Admissions office PRIOR to submitting this application.

List all colleges and/or universities attended.

Institution	Location	Dates of Enrollment	Degree earned/Major

List employment history, most recent first during the past five years.

Employer	Location	Title	Employer Phone Number

I understand that enrollment in the Paramedic Program signifies my willingness to conduct myself in accordance with the appropriate standards of personal behavior and to adhere to the academic policies and other regulations stated in the catalog. I grant permission for Paramedic Program to review my updated transcript for the purposes of this application.
