

# Radiologic Technology Licensure Disclosures

City College's Radiologic Technology curriculum meets the educational requirements for national certification. Students who complete this program will be prepared to sit for the American Registry of Radiologic Technologist (ARRT) Exam and apply for state licensure, where applicable. Each state administers licensing laws differently. See [additional information for licensure](#) from the American Society of Radiologic Technologists.

In addition to the educational requirements for licensure in Montana, the following additional requirements must be met:

- Successful completion of the ARRT Examination

Students should also be aware that criminal background, citizenship status, residency, age, and other factors may be a condition for licensure in Montana. Students are advised to review all available information on the [Montana Board of Radiologic Technologists website](#).

The following information indicates MSUB's most recent evaluation of whether its Radiologic Technology program meets the educational prerequisites required for licensure in each state.
