

General Education Committee Minutes

January 27, 2020

Present: Tien Chih Bernie Quetchenbach

Melinda Tilton Jason Comer Matt Queen Josh Hill

Emily Arendt Leanne Gilbertson

Cori Day Will Hobbs Brian Gurney Lance Mouser

Megan Thomas Naomi Norris (student)

Kathleen Thatcher (ex-officio)

Absent: Randi O'Brien*

*excused

Guest: Anne Cole

Melinda Tilton called the meeting to order at 3:00 p.m. in McMullen 305.

The minutes of December 2 & 10 were accepted as presented.

I. ANNOUNCEMENTS

Tien Chih stated that he applied for and was awarded an MUS Regent Teaching Scholars grant. He is going to recruit a group of faculty who teach Gen Ed courses to include high impact practices into their courses. His goal is to recruit four to six faculty to develop experiential projects to include in Gen Ed courses. If anyone is interested, let him know.

II. DISCUSSION/ACTION ITEMS

A. Gen Ed Re-Envisioning and Course Clean Up: Anne Cole and Leanne Gilbertson

First of all, Dr. Gilbertson noted that many of the courses they had originally thought to be non-transferable turned out to transfer just fine.

They are looking to capitalize on what we are already doing while we change the language we use to describe Gen Ed. The group also discussed changing and combining categories to focus on learning outcomes instead of categories.

It was noted that updating how our Gen Ed is structured is a great idea and will align us with national trends, but just changing the structure will not change how students think about Gen Ed. The real issue is communicating the purpose of Gen Ed to students. It was suggested that the best place to do that will likely be a first-year seminar course. Theoretically, faculty teaching Gen Ed courses are explaining the purpose of Gen Ed to students, but in reality many are not. Restructuring Gen Ed to focus on outcomes rather than categories will (hopefully) change how faculty teach those courses, but hinging a new program on faculty changing their courses is not the best plan. We need a better message to students at the outset, and we need a meaningful faculty orientation.

Many universities structure their Gen Ed around a theme that can be carried through the student's major courses as well. This theme can start with the first year experience course, or even with first contact with students, before they have even registered. It was noted that our problem may not be solved with good communication and marketing, because we are dealing with a cultural idea that one goes to college to get a job, and anything beyond that is extraneous.

It was noted that our current Gen Ed structure is built not to promote learning, but to generate FTE. Areas have been allocated resources so they can meet the requirements, and courses in Gen Ed with lower enrollments will not have the resources to handle a large influx of students. If we choose to include a first year experience and capstone in Gen Ed, how will those courses be taught in faculty loads?

In regards to courses to clean up (list attached to these minutes), eleven courses are not being offered. However, two of those are in the process of being deleted, and one is only offered in summer. Five Gen Ed courses do not transfer, but this number is much lower than initially thought.

The GEC agreed that members will fill out paperwork and speak with the departments about removing the courses not being offered, unless they have an explanation why the courses should remain in Gen Ed.

B. CourseLeaf Summary

The electronic course form is now a combination of all our existing paper course forms: the new course, the change course, and the Gen Ed course.

C. Discussion of Results of Student Focus Groups

The faculty teaching Gen Ed need to be the messengers of the Gen Ed purpose. Getting that message out will deal with many of the criticisms in the focus group results. We likely need training for all faculty who teach Gen Ed, but then we run into the issue of part-time instructors who may not even reside in Montana. Also, some part-time instructors don't know they are teaching until the last moment. We will need strategically planned communications for the rollout of a revised Gen Ed program.

D. Request for Gen Ed Syllabi

Since the GEC agreed that the biennial reviews are not working, instead we will collect syllabi for all Gen Ed courses. It was agreed that we will request a department or representative syllabus for each course, should it be offered in different modalities. We will also request for each course one key artifact/project that demonstrates a Gen Ed learning outcome. The Co-Chairs will draft a letter for the Committee's review.

The meeting adjourned at 4:17 p.m.

Respectfully submitted, Rita J. Rabe Meduna.

MSUB Strategic Action Plan

Sub Objective: 1.4 Reimagine general education to enhance student learning.

Re-Imagining General Education (Overview)

Desired Outcome: Revise general education to more clearly meet student learning outcomes and to foster communication skills, problem solving skills, critical thinking skills, and respect for diversity.

Proposed Action: Move to an integrative model that fully utilizes the strengths of MSUB and its faculty to enhance student learning.

General Education courses are offered in two major categories:

- I. Core Learning Skills Courses (CLS)
- II. Critical Inquiry & Experiential Learning Courses (CI or EL)

In addition, high-impact courses are embedded in two ways:

- 1. An entry point first-year seminar led by a faculty member
- 2. An exit point through a capstone course that could be fulfilled either through a general education or degree-seeking course.

General Education requirements remain at 31 cr. total and are distributed within two major categories as follows:

I. Core Learning Skills Courses (CLS)—16 cr.

Intended for all first-year students to develop foundational skills for college-level discourse and academic success, CLS courses provide a learning environment that fosters communication skills, problem solving skills, critical thinking skills, and respect for diversity in a supportive and collegiate manner. Courses are designed to initiate students as participants in the life-long pursuit of human knowledge and understanding. A faculty-taught first-year seminar that meets the learning outcomes for each category may substitute for one of these courses.

- CLS1. Written and Oral Communication—6cr.; 3cr. in each sub-category
- CLS2. Numerical Reasoning—3cr.
- **CLS3.** Scientific Inquiry—3 or 4cr. (*lab component or no? TBD*)
- **CLS4.** Global Perspectives—3cr.

II. Critical Inquiry and Experiential Learning Courses (CI or EL)—15 cr.

Courses in this category emphasize the methods used to discover, create, and advance the factual and theoretical knowledge of various academic disciplines.

Critical inquiry courses (CI) require at least one major student-created artifact based on applying methods of inquiry appropriate to the discipline. These artifacts are added to the student's e-portfolio.

Experiential Learning courses (EL) require students to have individual experience in the research and/or creative process to generate a scholarly product.

Lower-division in this category introduce students to the various academic disciplines. A faculty-taught first-year seminar that meets the learning outcomes for the category may substitute for one of these courses.

Upper-division (200 and up) courses are intended as a capstone experience for general education and/or the major.

All students must take at least one (1) CI or (1) EL course in each of the following 4 areas for a total of 15 cr. As part of this requirement students must complete at least one (1) EL course in the area of their choice for a minimum of 3cr. The capstone or senior-thesis in a student's major may qualify.

CI/EL Arts & Humanities—3 cr. min.

CI/EL Natural Sciences—3 cr. min.

CI/EL Social Sciences & History—3 cr. min.

CI/EL Cultural Diversity—3 cr. min.
